Report on Planned Actions to Implement the International Year of the Salmon (IYS) Initiative

The primary purpose of this IYS reporting template is for Parties / jurisdictions to provide:

- brief details of actions being planned or undertaken as a contribution to the IYS;
- identify which of the five IYS themes the actions are delivering on;
- identify the target audiences the actions intend to reach;
- specify the timeframe for undertaking the actions.

This information will then enable the North Atlantic Steering Committee (NASC) to report to the NASCO Council and IYS partners in the Pacific about activities planned and occurring in the Atlantic region as part of the IYS. It is our intention that the template is easy to complete with a brief description (maximum 200 words) of the action, followed by marking the appropriate tick boxes. The IYS website itself will allow people to register individual events so please do not give details of these here. To give an example of what is being sought the first row of the table has been completed with an illustration. In 2019 and 2020 it is anticipated that we will be requesting updates on progress with the actions provided to assess and report these to the NASC. Please complete this form and return it to the Secretariat **by 15 May 2018**.

For your reference the IYS themes appearing in the table are detailed further below:

Theme 1: *Status of Salmon*: to understand the present status of salmon and their environments

Theme 2: *Salmon in a changing salmosphere*: to understand and quantify the effects of natural environmental variability and anthropogenic factors affecting salmon distribution and abundance and to make projections of their future changes

Theme 3: *New Frontiers*: to develop new technologies and analytical methods to advance salmon science and to explore the uncharted regions of the salmosphere.

Theme 4: *Human Dimension*: to improve the resilience of people and salmon through the connection and collaboration of salmon-dependent communities, indigenous peoples, youth, harvesters and resource managers across the salmosphere.

Theme 5: *Information Systems*: to develop an integrated archive of accessible electronic data collected during the IYS and tools to support future research.

Established senior scientists are also invited to present their work and highlight areas where future research is required. NoWPaS is widely acknowledged as the most important workshop for early career researchers studying Atlantic salmon and provides an excellent opportunity to build and maintain a strong international network of young scientists working in this field.</p>	<p>Theme 1: <i>Status of Salmon</i> <input type="checkbox"/></p> <p>Theme 2: <i>Salmon in a changing salmosphere</i> <input type="checkbox"/></p> <p>Theme 3: <i>New Frontiers</i> <input checked="" type="checkbox"/></p> <p>Theme 4: <i>Human Dimension</i> <input type="checkbox"/></p> <p>Theme 5: <i>Information Systems</i> <input type="checkbox"/></p>	<p>Decision makers <input checked="" type="checkbox"/></p> <p>Public <input type="checkbox"/></p> <p>Children/Youth <input type="checkbox"/></p> <p>Knowledgeable public <input type="checkbox"/></p>	<p>04/03/2019</p>	<p>09/03/2019</p>
